

**CALIFORNIA DEPARTMENT OF WATER RESOURCES
OROVILLE FACILITIES
Cultural Resources Work Group**

Draft List of Study Plans

Prepared for Review and Comment at 9/25/01 CRWG meeting

CUL.S.1 -- Cultural Resources Inventory

Provides critical information needed to address Issue Statement CR1, and provides input needed to address Issue Statements CR2, CR3 and CR4.

CUL.S.2 -- Cultural Resources Evaluation

Provides critical information needed to address Issue Statement CR1, and provides input needed to address Issue Statements CR2, CR3 and CR4.

CUL.S.3 -- Cultural Resources Management

Provides critical information needed to address Issue Statements CR2 and CR3, and provides input needed to address Issue Statement CR4.

CUL.S.4 -- Cultural Resources Interpretive Evaluation

Provides information needed to address Issue Statement CR4, and is relevant to certain public education elements of CR2 and CR3.

Coordination Issues Relative to Other Work Groups

Sensitive cultural resource locations could affect development plans being considered by other groups (e.g., Recreation).

Other Work Group plans could lead to modifications of the Area of Potential Effects (e.g., reduction of fire fuels outside the FERC boundary).

Baseline data from Environmental Work Group (e.g., native plant inventories, geomorphology, hydrology) could provide input to understanding of paleoenvironmental conditions, site locations/use, and management of archaeological sites (e.g., using native plants to stabilize sensitive sites).
